Dion Burke was working hard toward his Ph.D. in anthropology. For Burkeever, alwaysthere was only Minos and Knossos and Bronze Age Crete. Infatuated with the Minoan culture, he dreamed of the day when he could prove his theory of an ancient cataclysmic event, previously undetected by modern historians. With the help of an aging, eccentric professor, they developed a remarkable machine that worked as both a language translator, and time inverter! They could now journey backback into the past to gather undeniable proof of what had happened centuries ago. So many questions finally answered! There was just one small problemwhatever was sent back in time, stayed there. But, back through time he journeyed, back to the ancient city of Knossos, where he found that myths and legends were real the Labyrinth, the Minotaurand something much more deadlyThe second novel *The People That Time Forgot* is an epic of imagination and science fiction adventure by one of the greatest science fiction authors of the Twentieth Century, Edgar Rice Burroughs. To Find Tyler, Thomas Billings, equipped with all the weaponry the modern world afforded, traveled across the oceans to Caprona, where even stranger mysteries awaited him, and a barbaric civilization lay hidden, torn between the impassable jungle on one side and an unknown menace on the other. But what chance did Billings havea modern man with modern machines in a land inhabited by the people that time forgot? Edgar Rice Burroughs brilliant sequel to *The Land*
