

Cancer in Children and Young People (Wiley Series in Nursing)

Much has changed since the first book Paediatric Oncology: Acute Nursing Care (1999), therefore, this new edition encompasses these changes in relation to the practice itself and the evidence that underpins it. Emphasis is placed on ensuring terminology is accurate, in keeping with the language of the current day. The book is divided into six sections: Chemotherapy, Haematopoietic Stem Cell Transplantation, General Surgery, Radiotherapy, Late Effects of cancer therapies, and Palliative Care. There is a brief commentary at the end of each section/chapter by a novice author but experienced practitioner, highlighting to the reader what is already known and what the section/chapter adds to their current knowledge and practice.
